DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-63 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 28-30 and 61-63 are rejected under 35 U.S.C. § 101 because it is directed to a "software" per se, i.e. instructions to operate a computer, which is not a process, machine, manufacture, or composition of matter and thus non-statutory. Note claims 28-30 and 61-63 invoke 112 6th paragraph with the means plus function language. While these means plus functions may be directed to the hardware implementation but also cover the software implementation of the disclosure (paragraphs 0131-132) which is non-statutory since the apparatus with this implementation contains only software.

Allowable Subject Matter

4. Claims 1-27 and 31-60 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sudo discloses a transmission device and transmission method.
